

IDS 517 HW5A Group Assignment

Improve your group's HW4 with some features did not implement.

Change your application to GUI (Graphic User Interface) application (use either Java Swing or FX library).

What to submit?

1. Source code // with detail comments ← this is a critical part

In a MS PPT file for group presentation:

2. Manual document: How to implement your JAVA GUI application, what IDE (e.g. Eclipse, IntelliJ, BlueJ, Netbean, etc) your team uses, how to start/run/use your project step by step with screen shot and description.
3. UML diagram for GUI and additional features added since HW4.
4. Self-Evaluation task: What is the most difficult task of this project and how your team approaches.

Submit to the course blackboard (Do not submit by email to the professor)

Presentation

Each team needs to demonstrate your work on the following class after the submission deadline. Each member of the team must present each task/function.

1. Explain GUI features with JAVA code.
2. Demonstrate your business GUI project
3. QnA from the audience

Final Submission Due Date: **Blackboard submission deadline**
